

What is another name for technical or functional spikes needed to uncover knowledge or reduce risk in the next PI	Exploration Enables
Which leadership style helps create a safe environment for learning, growth, and mutual influence	Leader as the developer of people
Scrum is built on transparency, inspection, and what else	Adaption
During which event are the Team PI Objectives agreed upon	PI Planning
Which role serves as the Servant Leader for the Agile Release Train	Release Train Engineer
Which statement is true about Lean Portfolio Management (LPM) and budgeting	LPM empowers stakeholders to adapt the current backlog and roadmap context
Who is responsible for managing the Portfolio Kanban	Lean Portfolio Management
Optimizing flow means identifying and reducing what?	Delays
Which statement is true about Program events?	Team events run inside the Program events, and the Program events create a closed loop system
How can trust be gained between the business and development	Deliver predictability
When are planning adjustments communicated back to the Agile Release Train after the management review	At the beginning of day two
Why do Business Owners assign business value to Teams' PI Objectives	To provide the teams with guidance of value to the business
What is this statement defining: "A series of activities that have proven to be effective in successfully implementing SAFe"?	The SAFe Implementation Roadmap
What is an example of cross-functional Iterations?	Iteration 1: Define, Build, Test; Define, Build, Test
What are two ways to describe a cross-functional Agile team?	They are optimized for communication and delivery of value
	They can define, build, and test a feature or component
What are two items that appear on the program board?	Features

	Significant dependencies
Which two areas are part of the Scaled Agile Framework Core Values?	Built-in Quality
	Alignment
What is the primary focus of Lean Portfolio Management?	Align Lean-Agile development with business strategy
Which statement is true about stretch Team PI Objectives?	They are part of the load but are not part of the commitment
What is an example of applying cadence and synchronization in SAFe?	Conducting a PI Planning Meeting
Which statement is a value from the Agile Manifesto?	Working software over comprehensive documentation
Why is it important to decouple deployment from release?	To enable deploying upon demand
What are the top two reasons for adopting Agile in an organization?	Enable changing priorities
	Accelerate product delivery
When would Large Solution SAFe be needed?	When there are more than two Agile Teams
If small batches go through the system faster with lower variability, then which statement is true about batch size?	Severe project slippage is the most likely result of large batches
If a program repeatedly shows, separate feature branches rather than a true System Demo, which practice should be reviewed to address the issue?	Continuous Integration
Which statement is true about Solution Context when defining large solutions?	It defines the environment in which the Solution operates
According to the Harvard Business Review article titled, "The New Product Development Game", what does it mean to create built-in instability?	Provide challenging requirements and a high degree of freedom to meet the requirements
The analyzing step of the Portfolio Kanban system has a new Epic with a completed Lean business case. What best describes the next step for the Epic?	It will be moved to the Portfolio Backlog if it receives a "Go" decision from Lean Portfolio Management
Which statement is a principle from the Agile Manifesto?	Working software is the primary measure of progress
At the end of PI Planning after dependencies are resolved and risks are addressed, a confidence vote is taken. What is the default method used to vote?	Fist of Five

What is the roof of the SAFe House of Lean?	Value
What is a benefit of enhancing enterprise agility?	It allows for a faster response to changing market opportunities
Weighted Shortest Job First gives preference to jobs with which two characteristics?	Shorter duration
	Higher Cost of Delay
What does the Continuous Delivery Pipeline enable?	Continuous learning cycles
What is the best measure of progress for complex system development?	System Demo
Which three types of decisions should remain centralized even in a decentralized decision-making environment?	Long lasting decisions
	Infrequent decisions
	Decisions with significant economies of scale
Which SAFe Principle includes providing autonomy with purpose, mission, and minimum constraints?	Unlock the intrinsic motivation of knowledge workers
SAFe's first Lean-Agile Principle includes "Deliver early and often" and what else?	Deliver value incrementally
What is one key purpose of DevOps?	DevOps joins development and operations to enable continuous delivery
A team has just adopted the SAFe Implementation Roadmap and is in the process of training executives, managers, and leaders. What is their next step?	Identify Value Streams and Agile Release Trains
Strategic Themes are different business objectives which help guide Solutions. Where are Strategic Themes found in the SAFe Big Picture?	Portfolio Level
What is one pillar of the SAFe House of Lean?	Flow
When should new approaches be anchored in an organization's culture?	Culture change comes last as a results of changing work habits
What is an attribute of an application built with DevOps in mind?	It ensures continuous integration with manual deployment
